Call for Abstracts**

Abstract Submission Deadline: 30.08.2017

Dear Colleagues and Friends,

we are delighted to invite you to attend the **1st International SIOPEN/GPOH Symposium for Neuroblastoma Research & SIOPEN Annual General Meeting 2017**. Please join us on Oct 25-27, 2017, in Berlin, Germany, for what promises to be a historic meeting laying the official foundation for future joint clinical trials of the two trial groups. We are happy to welcome the SIOPEN community for the first time in Berlin! This beautiful and historic city is not only the capital of Germany, but it is also the birthplace of neuroblastoma first described Rudolph Virchow in 1864. For this reason, we decided to host the Welcome Reception in the historic Virchow lecture hall including a tour of the Museum of Medical History. Presentations will cover the latest basic, translational and clinical neuroblastoma research including important topics such as tumor evolution, liquid biopsies and new drugs. There will be numerous opportunities for attendees to present their work, make fruitful connections, and engage in dialogue with colleagues from around the world. We encourage you to submit your work to be considered for a short talk or poster presentation. **The abstract deadline is September 15, 2017.**

Please plan to stay through Friday, Oct 27, to hear all presentations covering the new design of the upcoming SIOPEN neuroblastoma high-risk trial. Check the SIOPEN website www.siopen.org for program updates and announcements. We look forward to receiving your abstract submissions in the coming months and to welcoming you to Berlin in October!

Sincerely yours,

Angelika Eggert, Chair, GPOH neuroblastoma trial group
Barbara Hero, Holger Lode & Thorsten Simon, Steering committee GPOH neuroblastoma trial group
Dominique Valteau-Couanet, SIOPEN President

Mission

To increase the understanding of neuroblastoma pathogenesis, progression and treatment failure and to improve survival and quality of life for children with neuroblastoma.

Main Objectives

- To consolidate a platform for global collaboration
- To establish networks of multidisciplinary caregivers
- To develop new trial protocols
- To develop standards for radiotherapy and surgery
- To develop SOPs for biomaterial collection, handling and storage
- To develop SOPs for application of major research technologies
- To identify leaders for specific topics

Scientific Topics/Plenary Sessions

1. Molecular Risk Stratification
2. Liquid Biopsies
3. Tumor Heterogeneity+Tumor Microenvironment
4. New Preclinical Models: PDX, GEMM, zebrafish
5. New Immunotherapy Approaches
6. New Drug Targets/Early Clinical Trials
7. Neuroblastoma Pathogenesis/Genetics
8. Targeting MYC
9. Targeting ALK
10. Targeting RAS/MAPK
11. SIOPEN HR-NBL2 Clinical Trial Strategy
12. Update ongoing SIOPEN trials: HR-NBL-1, LINES, VERITAS, OMS
13. Update SIOPEN Biportal
14. Concept Biology+Relapse Umbrella Trial
